

Lesson #1: Let's get going!

Setting up your computer for using the Bernina artista software workbook.

Before opening the Bernina artista software, set up your computer for **metric** measurements.

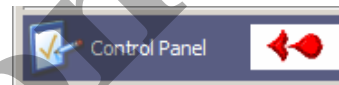

Using metric measurements levels the playing field between your computer software and your Bernina embroidery machine.

Pull the computer mouse to the bottom left corner of your computer screen.

Left click the Start button.

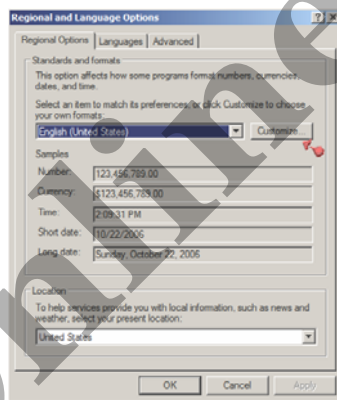

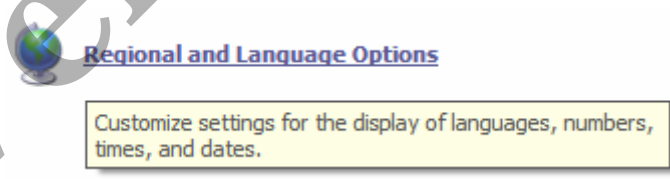

This will open a computer dialogue box. Locate and click on the Control Panel option.

Next left click on "Date, Time, Language, and Regional Options".

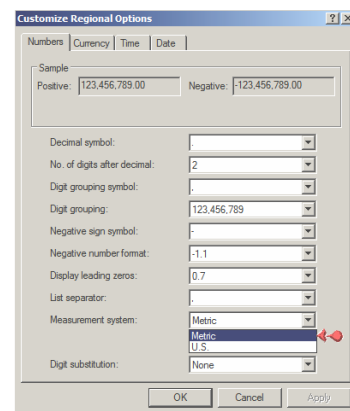

When the next dialogue box opens, left click on Regional and Language Options.

Regional and Language Options Dialogue box will open. Left Click on the Customize button next to English(United States).

Left Click the arrow beside the Measurement system window. Left click Metric. Click OK to close the window.

If you just can't deal with the metric measurements after you complete the lessons, just return to US measurements by repeating the steps.
